

Take Responsibility for Your Own Safety

Even with the most comprehensive security management solution in place, you need certain practical skills to protect your company, employees and family on a day-to-day basis. White Hawk Security Int'l Inc. offers training programs to help your team members (or you personally) put these security strategies into practice. Conducted by our team of professional security trainers, each of our training programs is designed with your company's or family's specific needs in mind.

White Hawk Security Int'l Inc.

Your Security Managed Better

Security management and training is our business and we understand that it's not yours. It is our policy to answer all of your questions, and then answer the ones you needed to ask, but didn't. Security management is what we do every day and we don't expect you to understand everything at first. However, we will do our best to ensure you understand things when our conversations are over.

If you have questions after we provide our services, you can easily reach us by phone or in person. Our doors are always open to our clients. We are here to answer your questions and make security management and training easy for you. We treat you the way that we would want to be treated if we were in your position. If you just have questions about our industry or the services that we provide, please give us a call, we are here to help. We look forward to the opportunity to serve you!

White Hawk Security Int'l Inc.

Your Security Managed Better

"Security is always seen as too much, until the day it is not enough."

William Webster, Former FBI Director

Who We Are

Trust is essential when choosing a security management partner. At White Hawk Security Int'l Inc., we have over 15 years of experience designing and implementing security management solutions—from physical security assessments to custom security systems for organizations and residential clients around the globe. More importantly, we have a high level of integrity and a strong work ethic, which means not only do we *always* do the *job right*, but we also *always* do the *right thing* when working with our clients.

While we have big corporation capabilities, White Hawk Security takes the most pride in the one-on-one attention we're able to give our clients. When you work with us (or are even considering it), we will be responsive to your needs and spend as much time as necessary to ensure you feel prepared and protected ... and can go about your business and your life with confidence.

What We Do

Now more than ever, safety and security are major concerns. However, very few small to mid-sized organizations, and even fewer individuals, take the appropriate steps to protect their assets and themselves ... until something happens.

Don't wait until there's an intruder, a theft, an attack or worse to make security a top priority. Call White Hawk Security today to assess your potential risks and put a security management solution in place for your business or home!

Don't Put Your Assets at Risk

White Hawk Security Int'l Inc. starts by asking you the right questions so that we can effectively assess your situation and build a security management solution that is tailored to your organization's needs. We also work hard to answer all of your questions (even those you don't know to ask), so that you understand the plan and can be an active participant in your own security.

But security isn't only important when you're in the office. Our global response team can assess crime threats and provide you with security—whether you're working in a remote office, hosting or attending out-of-town events or traveling for business or pleasure.

Our Services Include:

- Enterprise-Wide Risk Assessments
- Physical Security Assessments
- Life Style Assessments
- Crisis Management
- Emergency Response
- Business Continuity Planning
- Sports Arena / Entertainment Venue Security
- Hotel / Resort Security Evaluations
- Custom Security, Fire, Access Control & Camera Systems
- Security Department Reviews
- Due Diligence Investigations
- International Investigations
- Travel Security and Executive Protection

Protecting What's Important to You

Your business and home are worth much more than dollars. The people and assets inside are invaluable. White Hawk Security Int'l Inc. identifies your risks and vulnerabilities, such as leaving a door unlocked or poor lighting around your parking lot as well as crime levels in the area. We then offer strategies and solutions to help you avoid threats and keep your home and business safe and sound.

After creating a security plan for your home or business, White Hawk Security can also design custom security, fire and camera systems that fit your needs and are also easy to use, expand and upgrade. You can even take that security up a notch by adding features that allow you to see what's happening while you're away as well as control the security system, thermostat, lights and appliances remotely.
